

STIMULATION

Introduction of the Geology of the different formations.

Demonstrate and understand the objectives of **Matrix Acidizing in Carbonates and Sandstones**.

Lab Guideline with the different chemical and additives used and their purposes

Establish a knowledge of the **potential problems encountered during Acidizing Sandstones** (by products, etc.).

Show an **understanding of the different types of acids used in Sandstone and Carbonates acidizing and their applications**.

Demonstrate a **knowledge of the different type of damage**.

Establish an **understanding of the chemical reactions of acid with the formation**.

Demonstrate a **knowledge of the by-products of the chemical reactions of acid with the formation**.

Show the **ability to identify specific acidizing applications in the operations**.
